Star Analytics' Announces New Version of Star Integration Server (SIS)

*Powerful New Features in 2.2 Release Make SIS a Significant
Product in Hyperion BPM Market*

Palo Alto, CA, April 19, 2006: Star Analytics, Inc. announces a new version of Star Analytics' Star Integration Server (SIS), available immediately. This new release, Version 2.2 brings a host of powerful and significant new features to customers of the [Hyperion](#) (NSDQ:HYSL) Business Performance Management suite of products.

According to Quinlan K. Eddy, President of Star Analytics, "SIS 2.2 offers users of Hyperion BPM, including Hyperion Planning™ and Hyperion Financial Management™ (HFM), a powerful way to capitalize on their investment in Hyperion, by easily sharing their data with other financial systems around the enterprise."

"Among many other benefits, SIS Version 2.2 offers our customers tight integration with Hyperion's Master Data Management server, as well as more efficient delivery of information

New Version of Star Analytics' Star Integration Server (page 2)

to relational star schemas," said Eddy. "It also provides significantly improved extraction capabilities, and a number of important user interface enhancements."

Existing customers of the SIS product are saying very positive things about the new release. "Star Integration Server version 2.2 is an affordable software package that provides a two-pronged solution – increased performance for financial applications, and lower total cost of ownership," said Jeff Brobst, Senior Manager of Financial Applications at [Symantec Corporation](#) (NSDQ: SYMC). "It cost us more to evaluate the available alternatives to your SIS product than it cost us to simply buy it," said one SIS customer, a Director of Finance Systems at a Major Aircraft Manufacturer.

About Star Analytics

Star Analytics, Inc., a privately held corporation, is a premier provider of software automation products and solutions that enable companies to use the Hyperion Business Performance Management suite of products more effectively. Star has solved the challenge of sharing Hyperion BPM data with other databases and reporting applications, allowing Hyperion users to unlock the power of their financial systems, extending the use and availability of Hyperion data, essential for real-time planning, uninterrupted applications availability, and strategic reporting.
