Decision Support Technology becomes first Preferred StarPartner

Partnership to Address Hyperion Customers in North East

Palo Alto, CA, October 9th, 2006: Star Analytics, Inc. and Decision Support Technology, Inc. (DST) jointly announced that DST has become the first Preferred Partner in Star Analytics' [StarPartner Program](#). DST will be reselling Star Analytics' Star Integration Server (SIS) product to their US customers, primarily in the North East.

Star Integration Server (SIS) is a seamless and automated way to extract information from [Hyperion Solutions'](#) (NSDQ:HYSL) Business Performance Suite of applications into other Business Intelligence and financial applications. The partnership will provide DST with a valuable differentiation in offering its consulting services to both existing customers and new prospects. According to Andy Shenk, a Founding Partner at DST, "We see a tremendous advantage in the Star Analytics product in leveraging the power of Decision Support Technology's custom data integration and data analysis solutions. We feel that in

partnering with Star Analytics we can significantly benefit our customers by providing the distinctive data extraction capabilities that the Star products offer.”

Quinlan Eddy, CEO and Founder of Star Analytics, agreed: “We’re excited to have Decision Support Technologies as our first preferred StarPartner,” he said. “We feel confident that DST will be both an excellent representative of Star Analytics and a valuable strategic partner in their region of the country to help us get the message out about our solution and products to Hyperion customers.”

Shenk agreed: “With our exceptional local knowledge of the Hyperion market, customers and sales force, we believe we can better satisfy our client’s needs by offering them Star Integration Server as part of a total consulting solution from DST.”

About Star Analytics

Star Analytics, Inc. is a premier provider of software automation products and solutions that enable customers to use the Hyperion Business Performance Management suite of products more effectively. Star has solved the challenge of sharing Hyperion BPM data with other databases and reporting applications. This allows Hyperion users to unlock the power of their financial systems by extending the use and availability of Hyperion BPM data, essential for real-time planning, uninterrupted applications availability, and strategic reporting. Star Analytics is headquartered in Palo Alto, CA. See www.staranalytics.com for details.
